

M/s VISHAL ENTERPRISES

Govt. Licensed Electrical Contractor - MC 34227

An ISO 9001:2015 Company, GEM Accredited OEM

18, " VISHAL", Keruji Nagar, Chakkarbardi Road, Dhule Dist. - Dhule

Contact: (02562)249374, 8275580423

E-mail: vishalent@yahoo.co.in

Deals: LT/HT Electrical System, Manufacturing of all kinds of Control Panel, Non-FLP / FLP Fire Alarm Panel, Non-FLP / FLP Dyke Valve Controller, Siren Panel, APFCR Control Panel, Earthing System, AC Drives, Designing FASD Feeders, Auto Manual Fire Pump Control Panel, PLC/PIC based Automation System, AMF Panels, Control panels for DG sets, Pumps Integration with PLC System, ACB/VCB Installation and Commissioning, AMC Services.

We, **M/s Vishal Enterprises** take this opportunity to introduce ourselves as one of the leading Vendor for Industrial Electrical and Safety related professions. We are **OEM** of various customized and regular **Electrical/Automation Control panels**. We also provide all **Electrical, Civil, Mechanical** services. Isn't it convenient if you get these '**ALL UNDER ONE ROOF**'?

Our Clients: BPCL, Honeywell, IOCL, HPCL, IOTL, HMPL, Ircon-Soma, Municipal Corporations, Anacon, Evonith Metalics, SAIL etc.

Let's explore a product from our lineup.

PROGRAMMABLE SMART BATTERY CHANGEOVER PANEL

Introducing the Smart Battery Changeover Panel - Your Engine's Guardian!

Unlock the power of reliability with our Smart Automatic Battery Changeover Panel.

Are you tired of worrying about your fire engine's battery performance during crucial moments? Look no further! Our state-of-the-art Smart Automatic Battery Changeover Panel is designed to ensure uninterrupted power supply when it matters most.

KEY FEATURES:

- ✓ **Standout High AH Battery Compatibility:** Our product shines with its exceptional support for high AH battery ratings, made possible by our contacts boasting a current rating of up to **400 AMPs**, setting us apart from the competition.
- ✓ **Dynamic Load Shifting:** During engine cranking, if the fire engine doesn't start in the first attempt and the earlier connected battery's health is not well our panel intelligently switches the load to the healthy backup battery and engine will start without any interruption.
- ✓ **Customizable Threshold Voltage Setting:** Our panel is equipped with an advanced feature that allows users to customize the threshold voltage for battery changeover. The default setting is 15 volts; however, users can easily adjust this value using DIP switches to select from additional options of 12, 14, 16, 18, or 20 volts. This flexibility enables optimal performance and enhances battery longevity by allowing users to tailor the voltage to their specific application requirements.
- ✓ **Smart Voltage Monitoring:** Constantly monitors battery health, displaying real-time voltage on a high-resolution 128x64 GLCD panel.
- ✓ **Clear Indication of Active Battery:** Easily identify which battery is actively powering the load with the help of Lamp Indicators and GLCD Display, ensuring transparency and ease of monitoring.
- ✓ **Triple Crank Assurance:** With three attempts at cranking, you can trust that your engine will roar to life, even in challenging conditions.
- ✓ **Manual Override:** Take control with the priority switch and manual battery selection, ensuring flexibility and adaptability in any situation. Use Reset Push Button for resetting the system when required, also displays OEM contact details at a glance.

BENEFITS:

- **Enhanced Engine Reliability:** Our panel guarantees a seamless power transition, preventing downtime due to battery failure.
- **Real-time Monitoring:** Stay informed with instant voltage updates, allowing proactive maintenance and timely battery replacements.
- **User-Friendly Interface:** The intuitive design ensures ease of use, making it accessible for both seasoned professionals and newcomers.
- **Built to Last:** Crafted with durability in mind, our panel is programmed and designed to withstand the rigors of firefighting environments.

APPLICATIONS:

- ✓ Fire Engines
- ✓ DG Sets
- ✓ Emergency Response, Vehicles
- ✓ Critical Power Systems

SITE INSTALLATIONS:

- **BPCL Akola Depot** – Installed period: March 2024
- **IOCL Vashi Terminal** - Installed period: October 2023
- **IOCL Dhule Depot** – Installed period: October 2021 and many more

At all locations, these panels are running absolutely fault free since installation.

Invest in the future of battery management and experience peace of mind with the Smart Battery Changeover Panel. Trust in reliability, trust in us.

Contact us and secure your engine's power performance!
